Study Seminars

Greece

Birthplace of Ancient Achievements and Modern Heroism

Classrooms Without Borders offers for the first time a historic study seminar to explore Greece and its national and Jewish heritage. Greece is universally acknowledged as a vital source for the development of politics, philosophy, and culture, but it also possesses a remarkable Jewish community, spanning from northern cities to Mediterranean islands, that has contributed the life of the nation.

"Our goal is to enable participants to embark on an intellectual and physical journey into the core origins and elements of Western Civilization; its uniqueness and its growth and development over time and space."

Israel STEM Seminar: 4000 Years of Innovation

New for the summer of 2015, Classrooms Without Borders is offering a travel seminar that will take local science, technology, engineering and mathematics (STEM) educators and students to Israel. The seminar's focus is to expose the participants to a leading center of global innovation and provide to them a better understanding of the practical application of STEM outside of the classroom.
